

# SADC PF Symposium Theme: *Harnessing Artificial Intelligence for Effective and Efficient Parliamentary Processes in the SADC Region: Experiences, Challenges and Opportunities*

Bindura University  
of Science Education

## Artificial Intelligence (AI) for Parliaments in the SADC Region: *Insights from the Zimbabwean Context*

Professor Ronald Manhibi,  
Bindura University Science Education, Centre for AI Research – 2 June 2025

# Purpose of the Presentation:

To Explore how AI can modernise parliamentary work through experiences, challenges, and opportunities

## Presentation Roadmap

**Why AI**  
The Imperative

**Data Realities**  
The Challenge

**Grassroots  
Literacy**  
Foundation

**Collaboration  
Insights**  
Projects

**Path Forward**  
Recommendations

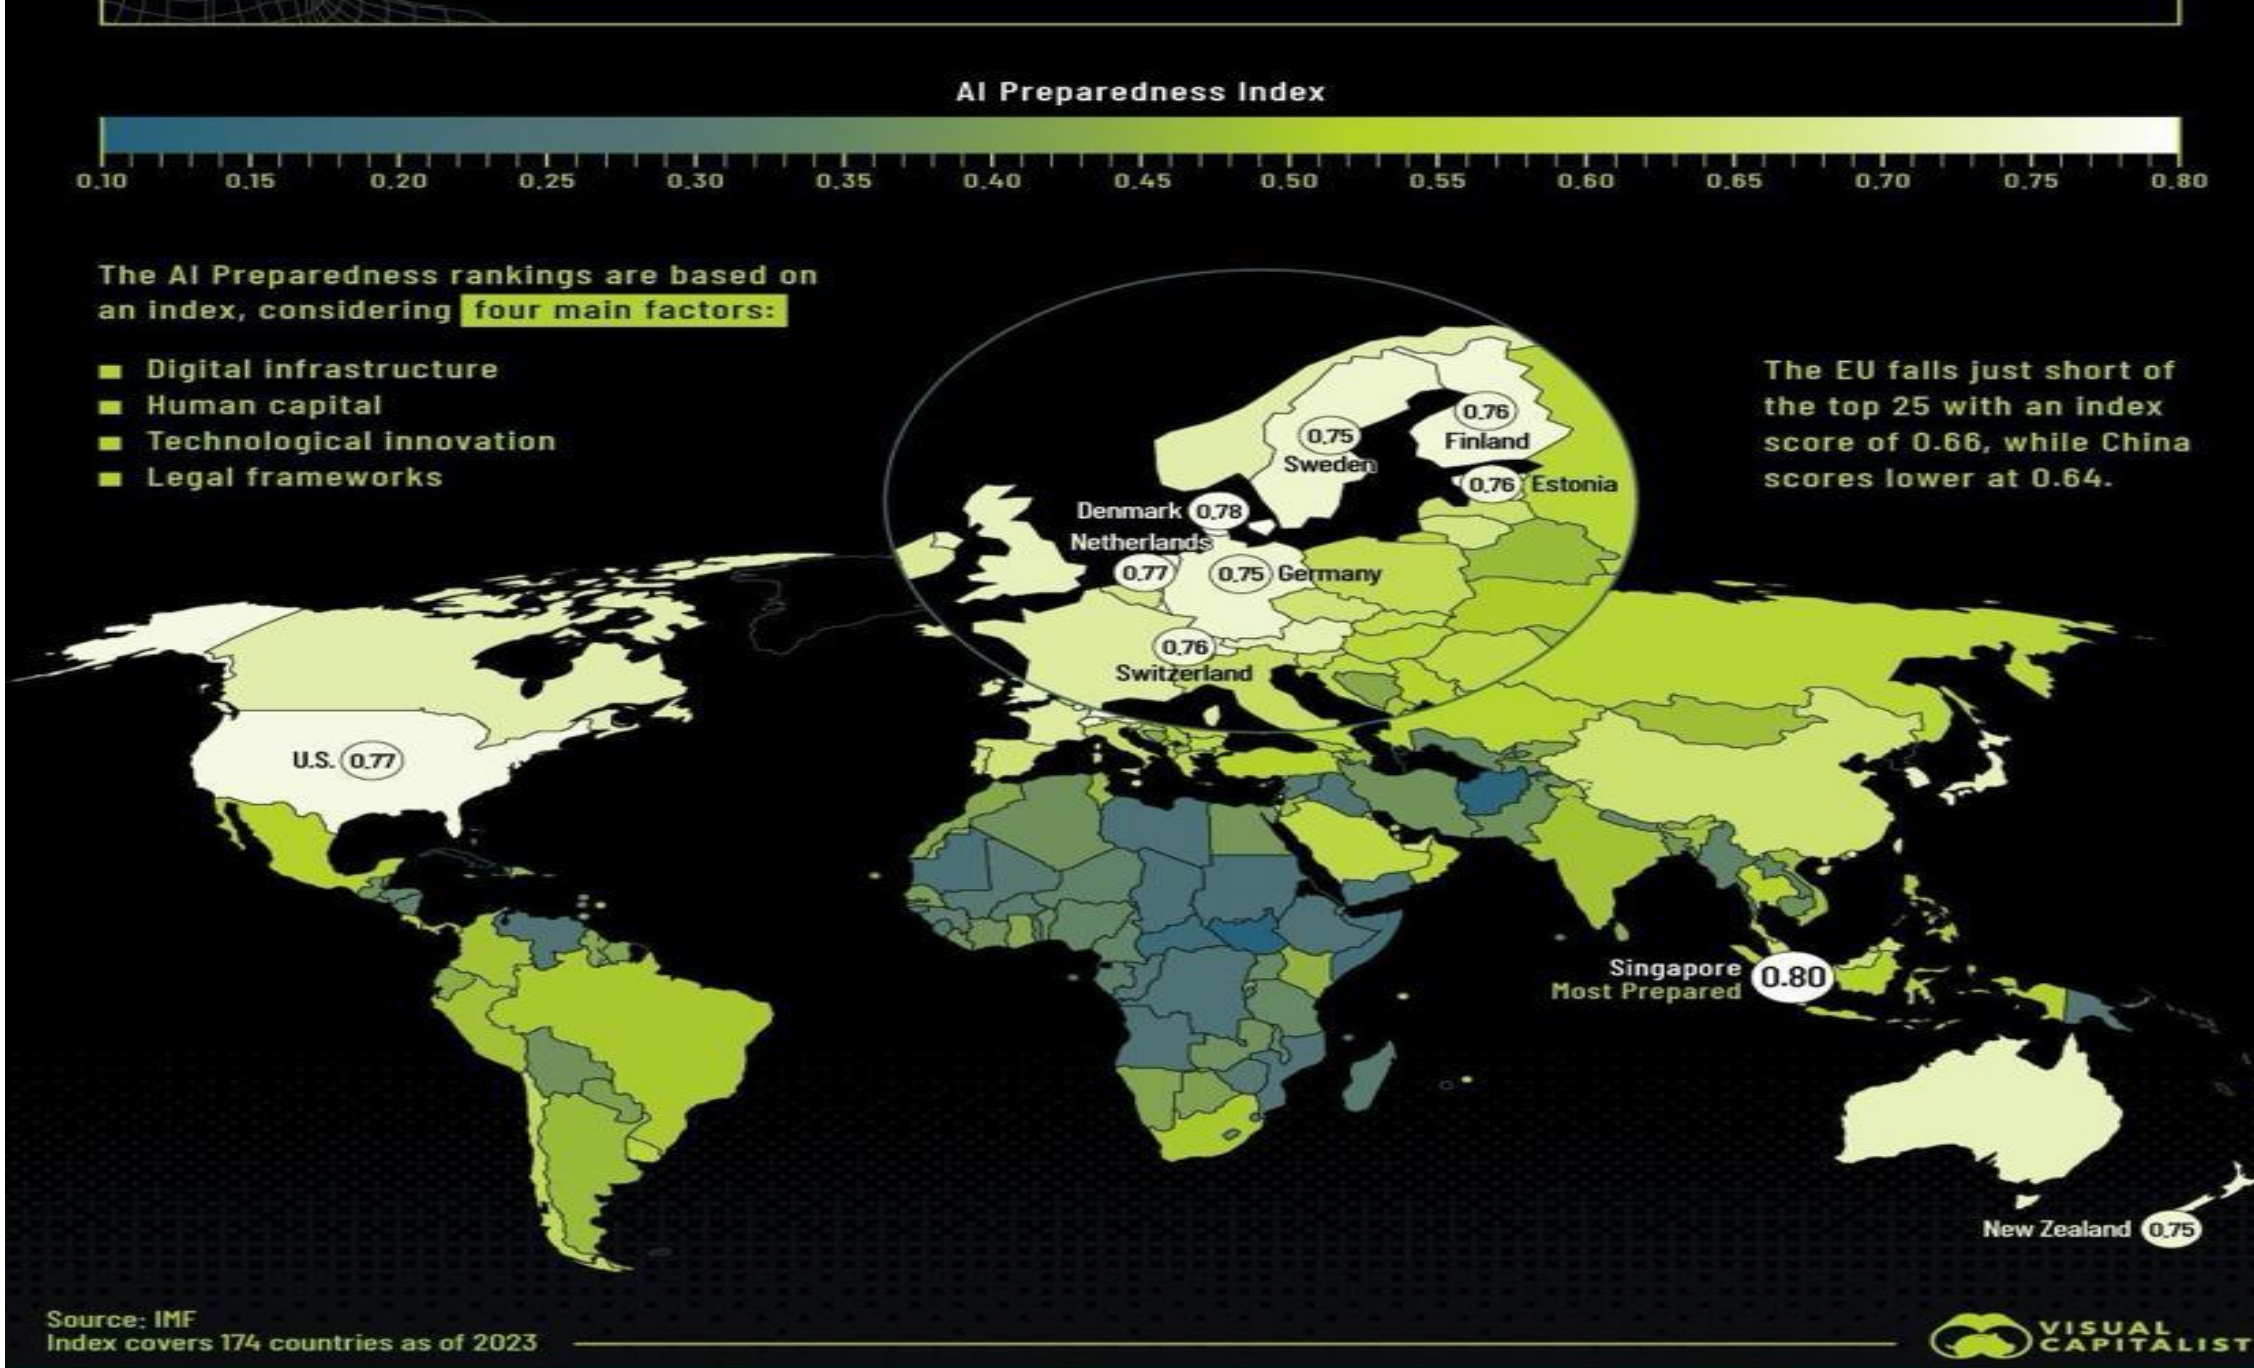

**"If I had asked people  
what they wanted,  
they would have said  
faster horses."**

**—Henry Ford**

Who are the Leaders in AI?

## AI's Fundamental Truth

AI without data is nothing — Its power is **100% data-dependent**

### Production Data

Manufacturing processes, electronics, vehicles

 **Concentrated in China**

### Consumption Data

Digital footprints, behaviors, preferences

 **Captured by US Tech Giants**

## SADC's Data Sovereignty Challenge

Limited Production Data

External Data Control

No Context-Specific AI

## The Critical Question

***"What data will power an African AI renaissance?"***

This data deficit represents the most significant hurdle for SADC

African Context

# Anticipated Key Challenges during AI Implementation

- **Upgrading Legislative Workflows**

*Shifting from paper-heavy, manual processes to AI-enabled drafting, research, and oversight tools without disrupting parliamentary protocols.*

- **Human–AI Collaboration Skills**

*Equipping MPs, committee clerks, and support staff with the digital fluency to interpret, question, and co-create with AI systems—so technology augments, does not confuse them during decision-making.*

- **Trusted Data Foundations**

*Curating secure, standard-ised, machine-readable datasets (Hansard, bills, budgets, committee evidence) while safeguarding confidentiality and data-protection mandates.*

- **Data Stewardship & Governance**

*Defining clear ownership, access controls, quality assurance, and ethical guidelines to prevent bias and misuse of legislative data and AI outputs.*

- **Change-Management & Culture Shift**

*Building leadership buy-in, aligning incentives, and fostering a culture that rewards experimentation—ensuring staff adaptation is proactive rather than reactive.*

# Zimbabwe Parliamentary AI Survey: The Skills Gap

Metric	Finding (n = 59)
Want further AI training	100 % of respondents
Self-rated “Good” or “Advanced” understanding	9 people (15 %)
Basic / Moderate / No knowledge	50 people (85 %)

- This 85 % skills-gap is the single biggest barrier—and opportunity—for SADC legislatures: building structured, hands-on AI capacity for Members, committee staff, and support services must move from ‘nice-to-have’ to ‘first order business’ if we want credible oversight and policy-making in the AI era.”

## Why this matters

- AI adoption will stall unless MPs, committee clerks & support staff can confidently **interpret, question, and oversee** AI tools.
- A unified **Parliamentary AI Capacity-Building Programme** is the quickest, highest-impact win for SADC legislatures.

## Build Digital Foundations First

Connectivity

Devices

Process Digitisation

## Invest in AI Literacy: Kindergarten to Tertiary

1

Train Teachers

2

Embed Robotics in Curricula

3

Integrate Data Science

4

Electronics Education

## Our Goal

**We need to urgently cultivate and develop an African Expression of AI**

Reflecting local cultures, values & addressing regional challenges

African Context

## Early Wins for Parliaments: Partner with the industry and Academia

Hackathons and Coding Clubs

Maker-Spaces

Low-Cost Devices  
(Affordable for all)

Support for locally-driven solutions

# There is a need for a synergistic approach when dealing with AI

AI is revolving and impacting on how we have traditionally done things in a way that seems like it doesn't care about whether you are interested in it or not!

## Academia-Legislature Partnership

BUSE Centre for AI × Parliament of Zimbabwe driving real-world AI pilots and digital transformation

## 🚀 Active AI Projects & Solutions

**Shuttle Buddie**  
Fleet Management

**MP Attendance**  
Digital Tracking

**Document Control**  
Digital Archive

**Workflow Automation**  
Jobs, Leave, Procurement

**Titus Platform**  
Hansard Translation

**Bill-Tracker**  
Legislative Monitoring

**Chiringa M&E**  
Dashboard Analytics

**AI-powered Chatbots**  
Citizen Engagement

## Key Lessons from the Collaboration

▶▶ Rapid Prototyping is critical

Shared Governance produces fast results

Continuous Skills Transfer is fundamental

**8+**  
Active Projects

# Collaboration Opportunities for SADC Parliaments

## SADC-wide AI Forums

Parliamentary-Academic AI Forum (hosted periodically).

## Legislative AI Accelerator

Fund a SADC Legislative AI Accelerator (grants for localized AI projects promoting SADC languages and datasets).

## AI Knowledge Portal

Launch an AI Knowledge Portal for cross-country learning.

## 🎯 Strategic Roadmap for AI-Powered Parliamentary Excellence

Aligned with Vision 2030 & Agenda 2063

### Close the Data Gap

- Foster local production networks
- Regain consumption data control
- Build sovereign datasets

### Prioritise Strategic Niches

- AI in legislation innovations
- Renewable energy components
- Public-sector robotics

### Enable SMEs & Innovators

- Open financial systems
- Accessible procurement pathways
- Innovation incubators

### Publish AI Strategies

- National AI roadmaps
- Regional coordination
- Readiness assessments

### Triple-Helix Collaboration

- Government • Industry • Academia
- Knowledge sharing platforms
- Joint innovation projects

### Scale AI Literacy

- Society-wide education
- MP micro-credentials
- Civil servant training

## Embed Ethics & Governance from Day One

 **Build Public Trust**

 **Ensure Transparency**

 **Promote Accountability**

 **Serve Public Good**

## Implementation Phases

**2024-2025**

**Foundation Building**

Digital infrastructure, literacy programs

**2026-2027**

**Pilot Implementation**

Strategic partnerships, niche projects

**2028-2030**

**Scale & Integration**

Regional coordination, full deployment

# Summary and Conclusion

The key idea of this presentation was to highlight that due to the pace at which AI is impacting all industries and business sectors (The SADC region is not an exception):

- It can no longer be ignored and avoided.
- Everyone needs to understand it (especially policymakers) since it is now part of our daily lives.
- As leaders, it is crucial to understand AI to harness opportunities and address challenges.

*Thank you,  
Merci  
Obrigado*
